

Level:0 C++ Revision

Name: Darshit Ambasana [ICT, Marwadi University]

- Project file to run: Level_Zero_Revision.exe
- Folder “Source Codes” contains 3 files: main.cpp, dsfunctions.h, and dsfunctions.cpp
- main.cpp = The main source file of project.
- dsfunctions.h = User defined header file included in project.
- dsfunctions.cpp = Logical definitions of dsfunctions.h functions.
- IDE used for project development = Visual Studio 2019

Concepts Demonstrated:

- Prepare a program covering the basic concepts of C++
- Thread
- Polymorphism
- Input/Output Files Txt/Json/XML
- Exception Handling
- Data Structure - Queue/Linkedlist/Vector/Arrays
- Inheritance
- Logging Mechanism
- Header files
- Constructor/Destructor

External Libraries Installed:

- Boost = For Logging mechanism and XML file parsing. Installed using NuGet Package manager console in Visual Studio.
- json/json.h = For parsing of JSON files. Installed from a github source.
